EXPERIENCE

Headout

Software Engineer - Backend

📅 11/2022 - Present 📍 Bengaluru/Remote

Building the future of how we experience our cities.

- Build several integrations between Headout and third-party vendor APIs to fulfil user bookings.
- Migrated the booking flow from synchronous API calls to asynchoronous messaging queues.
- Built and maintained several tools to help internal teams to help onboard new experiences in a blazing fast duration.
- Tech Stack: Kotlin, Spring Boot, MariaDB, Kafka, AWS, Next.js.

Walmart Global Tech India

Software Engineer - II

📅 01/2021 - 11/2022 📍 Bengaluru

Tech powerhouse that innovates for the world's largest retailer - Walmart.

- As part of the Store Systems Mobile Platform team, I created the backend services for Me@Walmart application which is available on both Android and iOS, to help facilitate the operations performed by a store associate.
- As part of the Vizpick team, I developed several microservices to make the downstocking process hassle-free for a store associate and scaled it to 5000 stores.
- Tech Stack: Java, Spring Boot, Kafka, Azure SQL, Cassandra, Kubernetes, CosmosDB.

PROJECTS

Awdience

📅 2023 📍 awdience.in

Awdience is a personal branding tool for entrepreneurs and creators to help them grow their audience on social media websites like LinkedIn.

- The tool allows users to get inspiration from several news articles based on the domain of the user and thousands of viral LinkedIn posts from the top creators on LinkedIn.
- The tool also allows users to generate content using AI and schedule the posts on his calendar as per their convenience.
- Tech Stack: Next.js, Tailwind, Kotlin, Spring Boot, AWS.
